Financial performance at a glance

December 2017 | Financial statement case study | Source units retained

Net sales	Gross profit	EBIT	Net income attributable
18,903.37	**11,058.47**	**3,969.71**	**2,547.90**

Measure	2016	2017
Gross profit margin	58.50%	58.50%
Operating margin (EBIT / sales)	21.00%	21.00%
Net margin (attributable income / sales)	13.45%	13.48%
Net sales growth, 2017 vs 2016	-	2.06%

Revenue grew 2.06% versus 2016; gross and operating margins remained broadly stable.
Review cost drivers alongside sales growth; monitor liquidity and financing needs separately.
Amounts are from the supplied model. Currency, scale and actual/forecast status are not specified in the export.

Income statement

December 2016 and December 2017 | Comparable annual periods

Measure	2016	2017
Net sales	18,521.04	18,903.37
Cost of sales	7,686.23	7,844.90
Gross profit	10,834.81	11,058.47
Selling, general & administrative expenses	6,482.36	6,616.18
EBIT (source-reported)	3,889.42	3,969.71
Earnings before tax	3,969.61	4,058.79
Income tax provision	1,290.12	1,319.11
Net income including noncontrolling interests	2,679.49	2,739.68
Less: noncontrolling interests	187.56	191.78
Net income attributable to the company	2,491.92	2,547.90

Checks: sales - cost of sales = gross profit; earnings before tax - tax = consolidated net income.
Gross profit less SG&A exceeds reported EBIT by 472.58 in 2017. The export does not explain this bridge.
Reported EBIT is retained; no unsupported expense adjustment has been invented.

Balance sheet & liquidity

December 2017 closing balances | No sum across year-end snapshots

Total assets	Total liabilities	Total equity	Current ratio
14,666	11,926	2,740	1.04x

Measure	2017
Cash and cash equivalents	500
Receivables	1,813
Current assets	4,668
Current liabilities	4,503
Net working capital: current assets - current liabilities	165
Cash ratio: cash / current liabilities	0.11x
Quick ratio: (cash + receivables) / current liabilities	0.51x

Balance check: 14,666 = 11,926 + 2,740. Ratios use the rounded closing balances in the source PDF.
Current assets exceed current liabilities only modestly; review collection timing and near-term obligations.

Cash flow & funding

Year ended December 2017 | Source units retained

Operating cash flow	Capital expenditure	OCF less capex	Closing cash
3,282.59	**(756.13)**	**2,526.46**	**500.00**

Cash reconciliation	2017
Cash at beginning of year	500.00
Net cash provided by operations	3,282.59
Net cash used in investing	(756.13)
Net cash used in financing	(2,526.46)
Net cash movement	0.00
Cash at end of year	500.00

Operating cash flow less capex is a defined analytical measure, not net financing cash flow.
The source label "Cash Flow for Financing Activities" is replaced by "OCF less capex" for this calculation.
Funding outflows absorb cash generated after capital expenditure in the supplied 2017 figures.

Working capital & financial ratios

December 2017 | Definitions made explicit

Measure / calculation	2017
Operating working capital (source definition)	372.65
Standard net working capital (rounded balance sheet)	165
Gross profit margin: 11,058.47 / 18,903.37	58.50%
Operating margin: 3,969.71 / 18,903.37	21.00%
Net margin: 2,547.90 / 18,903.37	13.48%
Pretax margin: 4,058.79 / 18,903.37	21.47%
Total liabilities / assets: 11,926 / 14,666	81.32%
Total liabilities / total equity: 11,926 / 2,740	4.35x

Operating working capital excludes cash and debt: 4,167.80 - 3,795.15 = 372.65.
Standard net working capital includes all current assets and liabilities: 4,668 - 4,503 = 165.
Liability-based leverage is labelled explicitly; it is not presented as interest-bearing debt.
Both working capital measures are useful, but answer different business questions.

Sales analysis | separate sample

2013-2014 financials page | Separate dataset; not combined with the financial statements

Measure	2013	2014
Sales revenue	26,415,255.51	92,311,094.75
Gross profit	3,878,464.51	13,015,237.75
Gross margin (profit / revenue)	14.68%	14.10%

Business interpretation

The displayed 2014 revenue is higher, while gross margin is about 0.58 percentage points lower.
The export does not establish equal month coverage, so the revenue difference is not labelled annual growth.
A useful next analysis is product and country margin contribution using the original report slicers.
The original forecast is excluded because its assumptions and validation are not documented.

This dataset is deliberately separated from the Colgate-Palmolive-labelled financial statement model.
Values are transcribed from the supplied Power BI PDF; currency and source scale remain unspecified.

Calculation review & source notes

A reproducible portfolio presentation | Reporting scope and checks

Review item	Original display	Portfolio treatment
Net margin	0.24	13.48% for 2017
Operating margin	1.25E-5	21.00% for 2017
Total assets card	154.2K across years	14,666 at Dec 2017
Total liabilities card	121.6K across years	11,926 at Dec 2017
Ratio cards	Mixed totals / periods	2017 period aligned
Forecast visuals	Assumptions unavailable	Excluded from this PDF

Basis: Financial report.pdf, eight pages supplied by HeeJung Kim; calculations use displayed source values.
The source statements identify Colgate-Palmolive. These model figures are not verified company filings.
Actual versus forecast classification, currency and units require confirmation from the original dataset.
Rounded balance-sheet inputs limit precision. No independent source-data audit is claimed.
This PDF is a rebuilt static analytical presentation, not a new export of a corrected Power BI model.
The original PBIX measures and visuals still need the same changes in Power BI Desktop.
